WORK EXPERIENCE

Frontend Developer
MindK (Internship)
📅 10/2021 - 02/2022

Website development

- During my internship as a frontend web developer, I was involved in various tasks, including developing user interfaces using HTML, CSS, and JavaScript. Additionally, I optimized website performance and ensured responsive design for different devices. I also continuously learned new technologies and tools to enhance my skills and contribute to various web projects. My internship was a valuable experience that allowed me to apply knowledge and improve my frontend development skills.

Frontend Developer
Freelance
📅 08/2022 - 12/2022

Strengthened my knowledge as a front-end developer

- In freelance job, I had the opportunity to apply my web development skills. The main focus of my work was creating web applications using HTML, CSS, and JavaScript. I actively utilized these technologies to develop user interfaces, apply styling, and add interactivity to web pages. During my freelance work, I also employed CSS preprocessors like SCSS for convenient styling and code organization, enabling me to create structured and easily maintainable style code. Overall, my freelance job provided me with valuable web development experience. I gained practical skills in using core programming languages and frameworks, as well as learned to work in a team and apply modern technologies to create high-quality web applications.

PET-PROJECT

To-do list
📅 03/2023 - 04/2023

Together with a friend, we decided to create a small pet project to delve into JS and understand how to work with LocalStorage.

- Not without the help of ChatGPT
- Advanced my understanding of JS/LocalStorage
- Gained experience working collaboratively using Live Share/GitHub.
- GitHub - https://cumandor.github.io/toDoList/

SKILLS

HTML5   CSS3/SCSS/TailwindCSS
